SUBJECT INDEX

Alluvial channels

Bedform Length and Velocity Pulsations in Alluvial Channels, Khalid Mahmood and Muhammad I. Haque, WW May 88 p315-330.

Amplitude

Parabolic Wave Computations in Non-orthogonal Coordinate Systems, James T. Kirby, WW Nov. 88 p673-685.

Arches

Earthquake Response of Submerged Circular Arch, A. N. Williams and S. T. Mau, WW July 88 p405-422.

Armor units

Armor Layer Stability of Rubble-Mound Breakwaters, Per Anders Hedar, WW May 86 p343-350.

Deterministic and Probabilistic Design of Breakwater Armor Layers, Jentsje W. van der Meer, WW Jan. 88 p66-80.

Hydraulic Stability Analysis of Armor Units, Nobuhisa Kobayashi and Ashwini K. Otta, WW Mar. 87 p171-186.

Wave Forces on Concrete Armor Units, William G. McDougal, Jeffrey A. Melby and Joseph W. Tedesco, WW Sept. 88 p582-598.

Barges

Wave Interactions between Barges, P. Sayer and H. K. Liang, WW May 86 p402-417.

Barriers

Interaction of Periodic Waves with Inclined Portable Barrier, Seyed Mehdi Sobhani, Jiin-Jen Lee and L. Carter Wellford, Jr., WW Nov. 88 p745-761.

Beach erosion

Expression for Shoreline Advancement of Initially Plane Beach, Kyungduck Suh and Robert A. Dalrymple, WW Nov. 88 p770-777.

Laboratory Investigation of Dune Erosion, M. F. Overton, J. S. Fisher and M. A. Young, WW May 88 p367-373.

Offshore Breakwaters in Laboratory and Field, Kyungduck Suh and Robert A. Dalrymple, WW Mar. 87 p105-121.

Bed roughness

Transition in Oscillatory Flow over Rough Beds, John F. A. Sleath, WW Jan. 88 p18-33.

Bedforms

Bedform Length and Velocity Pulsations in Alluvial Channels, Khalid Mahmood and Muhammad I. Haque, WW May 88 p315-330.

Boating

River Recreation Boating Impacts, Reiner Jaakson, WW May 88 p363-367.

Boundary element method

Hydrodynamics of Ice Mass Near a Large Offshore Structure, Michael Isaacson and Kwok Fai Cheung, WW July 88 p487-502.

Boundary layer

Seabed Current Boundary Layers in Wave-Plus Current Flow Conditions, Kostas F. Lambrakos, Dag Myrhaug and Olav H. Slaattelid, WW Mar. 88 p161-174.

Breakwaters

Breakwater Gap Wave Diffraction: An Experimental and Numerical Study, John D. Pos and Frederic A. Kilner, WW Jan. 87 p1-21.

Diffraction Patterns Near Narrow Breakwater Gap, Rodney J. Sobey and Thomas L. Johnson, WW July 86 p512-528.

Interaction of Periodic Waves with Inclined Portable Barrier, Seyed Mehdi Sobhani, Jiin-Jen Lee and L. Carter Wellford, Jr., WW Nov. 88 p745-761.

Interaction of Wind Waves with Vertical Wall, Witold Cieślikiewicsz and Stanislaw R. Massel, WW Sept. 88 p653-672.

Offshore Breakwaters in Laboratory and Field, Kyungduck Suh and Robert A. Dalrymple, WW Mar. 87 p105-121.

Parabolic Wave Computations in Non-orthogonal Coordinate Systems, James T. Kirby, WW Nov. 88 p673-685.

Wave Forces on Concrete Armor Units, William G. McDougal, Jeffrey A. Melby and Joseph W. Tedesco, WW Sept. 88 p582-598.

Wave Propagation Between Two Breakwaters, Philip L. -F. Liu and Polly L. Boissevain, WW Mar. 88 p237-247.

Buoyant jets

Model of Buoyant-Jet-Surface-Wave Interaction, David A. Chin, WW May 88 p331-345.

Buried pipes

Wave-Induced Forces on Buried Pipelines, William G. McDougal, Susan H. Davidson, Peter L. Monkmeyer and Charles K. Sollitt, WW Mar. 88 p220-236.

Caissons

Wave-Induced Pressure under Gravity Structure, Philip L.-F. Liu, WW Jan. 85 p111-120.

Causeways

Erosion at Bend of Gravel Causeway Due to Waves, Nobuhisa Kobayashi and Kyung-Seok Han, WW May 88 p297-314.

Coastal morphology

Offshore Breakwaters in Laboratory and Field, Kyungduck Suh and Robert A. Dalrymple, WW Mar. 87 p105-121.

Coastal structures

Duration of Extreme Wave Conditions, Orson P. Smith, WW Jan. 88 p1-17.

Computation

Parabolic Wave Computations in Non-orthogonal Coordinate Systems, James T. Kirby, WW Nov. 88 p673-685.

Computerized simulation

Computer Simulation of Moored Ship Behavior, G. van Oortmerssen, J. A. Pinkster and H. J. J. van den Boom, WW Mar. 86 p296-308.

Conduits

Outlet Structure Design for Conduits and Tunnels, Clifford, D. Smith, WW July 88 p503-515.

Contaminants

Managing Contaminated Dredged Material: Application, James W. Male, M. John Cullinane, Jr. and Keith Phillips, WW Sept. 88 p565-581.

Procedure for Managing Contaminated Dredged Material, James W. Male and M. John Cullinane, Jr., WW Sept. 88 p545-564.

Coordinates

Parabolic Wave Computations in Non-orthogonal Coordinate Systems, James T. Kirby, WW Nov. 88 p673-685.

Currents

Forces on Marine Risers in Coexisting Environment, Zeki Demirbilek, WW May 88 p346-359.

Cylinders

Second-Order Diffraction Loads on Truncated Cylinders, A. G. Abul-Azm and A. N. Williams, WW July 88 p436-454.

Cylindrical shells

Earthquake Response of Submerged Circular Arch, A. N. Williams and S. T. Mau, WW July 88 p405-422.

Decision making

Managing Contaminated Dredged Material: Application, James W. Male, M. John Cullinane, Jr. and Keith Phillips, WW Sept. 88 p565-581.

Deep water

Deep Water Swell and Spectral Wave Decay in Opposing Winds, Ian R. Young and Rodney J. Sobey, WW Nov. 88 p732-744.

Density stratification

Wave Interaction with Rectangular Trench in Density-Stratified Fluid, Francis C. K. Ting and Fredric Raichlen, WW Sept. 88 p615-636.

Dilution

Model of Buoyant-Jet-Surface-Wave Interaction, David A. Chin, WW May 88 p331-345.

Discrete elements

Discrete Wave Approach to Wave Force Statistics, Richard H. Swift, WW Nov. 88 p700-713.

Dispersion relations

Calculation of Evanescent Wave Modes, W. D. McKee, WW May 88 p373-378.

Dolos

Wave Forces on Concrete Armor Units, William G. McDougal, Jeffrey A. Melby and Joseph W. Tedesco, WW Sept. 88 p582-598.

Drag

Wave Phase/Amplitude Effects on Force Coefficients, R. T. Hudspeth, J. H. Nath and P. Khare, WW Jan. 88 p34-49.

Dredge spoil

Managing Contaminated Dredged Material: Application, James W. Male, M. John Cullinane, Jr. and Keith Phillips, WW Sept. 88 p565-581.

Procedure for Managing Contaminated Dredged Material, James W. Male and M. John Cullinane, Jr., WW Sept. 88 p545-564.

Dredging

Managing Contaminated Dredged Material: Application, James W. Male, M. John Cullinane, Jr. and Keith Phillips, WW Sept. 88 p565-581.

Procedure for Managing Contaminated Dredged Material, James W. Male and M. John Cullinane, Jr., WW Sept. 88 p545-564.

Sand-Bypassing Simulation Using Synthetic Longshore Transport Data, J. Richard Weggel, Scott L. Douglass and John E. Tunnell, WW Mar. 88 p146-160.

Dunes

Laboratory Investigation of Dune Erosion, M. F. Overton, J. S. Fisher and M. A. Young, WW May 88 p367-373.

Dynamic loads

Wave-Induced Forces on Buried Pipelines, William G. McDougal, Susan H. Davidson, Peter L. Monkmeyer and Charles K. Sollitt, WW Mar. 88 p220-236.

Dynamic pressure

Interaction of Wind Waves with Vertical Wall, Witold Cieślikiewicsz and Stanislaw R. Massel, WW Sept. 88 p653-672.

Dynamic response

Earthquake Response of Submerged Circular Arch, A. N. Williams and S. T. Mau, WW July 88 p405-422.

Earthquake excitation

Earthquake Response of Submerged Circular Arch, A. N. Williams and S. T. Mau, WW July 88 p405-422.

Eddies

Modeling Tidal Circulation in an Island's Wake, Roger A. Falconer, Eric Wolanski and Lida Mardapitta-Hadjipandeli, WW Mar. 86 p234-254.

Electrolysis

Electrodeposited Minerals in Marine Structures, Mark B. Gravens, WW July 88 p519-524.

Energy losses

Energy Losses and Floating Breakwater Response, Mario Fugazza and Luigi Natale, WW Mar. 88 p191-205.

Environmental impacts

River Recreation Boating Impacts, Reiner Jaakson, WW May 88 p363-367.

Equilibrium equations

Expression for Shoreline Advancement of Initially Plane Beach, Kyungduck Suh and Robert A. Dalrymple, WW Nov. 88 p770-777.

Erosion

Erosion at Bend of Gravel Causeway Due to Waves, Nobuhisa Kobayashi and Kyung-Seok Han, WW May 88 p297-314.

Interaction Between Vibrating Pipe and Erodible Bed, B. Mutlu Sumer, Ye Mao and Jørgen Fredsøe, WW Jan. 88 p81-92.

Laboratory Investigation of Dune Erosion, M. F. Overton, J. S. Fisher and M. A. Young, WW May 88 p367-373.

Finite elements

Breakwater Gap Wave Diffraction: An Experimental and Numerical Study, John D. Pos and Frederic A. Kilner, WW Jan. 87 p1-21.

Floating breakwaters

Energy Losses and Floating Breakwater Response, Mario Fugazza and Luigi Natale, WW Mar. 88 p191-205.

Floating structures

Computer Simulation of Moored Ship Behavior, G. van Oortmerssen, J. A. Pinkster and H. J. J. van den Boom, WW Mar. 86 p296-308.

Flow rates

Bedform Length and Velocity Pulsations in Alluvial Channels, Khalid Mahmood and Muhammad I. Haque, WW May 88 p315-330.

Fourier analysis

Wave Force Coefficients for Submarine Pipelines, N. Jothi Shankar, Hin-Fatt Cheong and K. Subbiah, WW July 88 p472-486.

Geomorphology

Near-Shore Sediment Dynamics Around Madras Port, India, K. V. S. R. Prasad and B. S. R. Reddy, WW Mar. 88 p206-219.

Gravel

Erosion at Bend of Gravel Causeway Due to Waves, Nobuhisa Kobayashi and Kyung-Seok Han, WW May 88 p297-314.

Hurricanes

Parametric Hurricane Wave Prediction Model, Ian R. Young, WW Sept. 88 p637-652.

Hydrodynamics

Forces on Marine Risers in Coexisting Environment, Zeki Demirbilek, WW May 88 p346-359.

Hydrodynamics of Ice Mass Near a Large Offshore Structure, Michael Isaacson and Kwok Fai Cheung, WW July 88 p487-502.

Modeling Tidal Circulation in an Island's Wake, Roger A. Falconer, Eric Wolanski and Lida Mardapitta-Hadjipandeli, WW Mar. 86 p234-254.

Modeling Tidal Transport in Arabian Gulf, Wen-Sen Chu, Bruce L. Barker and Ali M. Akbar, WW July 88 p455-471.

Second-Order Diffraction Loads on Truncated Cylinders, A. G. Abul-Azm and A. N. Williams, WW July 88 p436-454.

Wave Force Coefficients for Submarine Pipelines, N. Jothi Shankar, Hin-Fatt Cheong and K. Subbiah, WW July 88 p472-486.

Ice flow

Hydrodynamics of Ice Mass Near a Large Offshore Structure, Michael Isaacson and Kwok Fai Cheung, WW July 88 p487-502.

Inertia

Wave Phase/Amplitude Effects on Force Coefficients, R. T. Hudspeth, J. H. Nath and P. Khare, WW Jan. 88 p34-49.

Integral equations

Wave Interactions between Barges, P. Sayer and H. K. Liang, WW May 86 p402-417.

Interactions

Wave Interactions between Barges, P. Sayer and H. K. Liang, WW May 86 p402-417.

Islands

Diffraction of Waves in Caustics, Donghoon Yoo and Brian A. O'Connor, WW Nov. 88 p715-731.

Modeling Tidal Circulation in an Island's Wake, Roger A. Falconer, Eric Wolanski and Lida Mardapitta-Hadjipandeli, WW Mar. 86 p234-254.

Lift

Lift Forces on Pipelines in Steady Flow, Jørgen Fredsoe and Erik Asp Hansen, WW Mar. 87 p139-155.

Littoral drift

Mathematical Model for Littoral Drift, Rolf Deigaard, Jorgen Fredsoe and Ida Broker Hedegaard, WW May 86 p351-369.

Near-Shore Sediment Dynamics Around Madras Port, India, K. V. S. R. Prasad and B. S. R. Reddy, WW Mar. 88 p206-219.

Sand-Bypassing Simulation Using Synthetic Longshore Transport Data, J. Richard Weggel, Scott L. Douglass and John E. Tunnell, WW Mar. 88 p146-160.

Statistical Description of Longshore Transport Environment, J. Richard Weggel and Marc Perlin, WW Mar. 88 p125-145.

Marinas

Pleasure Craft Profile Heights for Marina Design, Russell H. Boudreau, Emy M. Tatami and John M. Nichol, WW Jan. 88 p95-98.

Mathematical models

Computer Simulation of Moored Ship Behavior, G. van Oortmerssen, J. A. Pinkster and H. J. J. van den Boom, WW Mar. 86 p296-308.

Diffraction of Waves in Caustics, Donghoon Yoo and Brian A. O'Connor, WW Nov. 88 p715-731.

Mathematical Model for Littoral Drift, Rolf . Deigaard, Jorgen Fredsoe and Ida Broker Hedegaard, WW May 86 p351-369.

Model of Buoyant-Jet-Surface-Wave Interaction, David A. Chin, WW May 88 p331-345.

Modeling Tidal Circulation in an Island's Wake, Roger A. Falconer, Eric Wolanski and Lida Mardapitta-Hadjipandeli, WW Mar. 86 p234-254.

Soft Mud Properties: Voigt Model, Jerome P.-Y. Maa and Ashish J. Mehta, WW Nov. 88 p765-770.

Mineral deposits

Electrodeposited Minerals in Marine Structures, Mark B. Gravens, WW July 88 p519-524.

Mooring

Computer Simulation of Moored Ship Behavior, G. van Oortmerssen, J. A. Pinkster and H. J. J. van den Boom, WW Mar. 86 p296-308.

Mud

Soft Mud Properties: Voigt Model, Jerome P.-Y. Maa and Ashish J. Mehta, WW Nov. 88 p765-770.

Nonlinear analysis

Diffraction of Waves in Caustics, Donghoon Yoo and Brian A. O'Connor, WW Nov. 88 p715-731.

Numerical analysis

Breakwater Gap Wave Diffraction: An Experimental and Numerical Study, John D. Pos and Frederic A. Kilner, WW Jan. 87 p1-21.

Numerical models

Hydraulic Stability Analysis of Armor Units, Nobuhisa Kobayashi and Ashwini K. Otta, WW Mar. 87 p171-186.

Model for Refraction of Water Waves, Robert A. Dalrymple, WW July 88 p423-435.

Modeling Tidal Transport in Arabian Gulf, Wen-Sen Chu, Bruce L. Barker and Ali M. Akbar, WW July 88 p455-471.

Refraction-Diffraction Model for Linear Water Waves, Bruce A. Ebersole, WW Nov. 85 p939-953.

Waterline Oscillation and Riprap Movement, Nobuhisa Kobayashi and Jeffrey H. Greenwald, WW May 88 p281-296.

Wave Propagation Between Two Breakwaters, Philip L. -F. Liu and Polly L. Boissevain, WW Mar. 88 p237-247.

Ocean waves

Wave-Induced Forces on Buried Pipelines, William G. McDougal, Susan H. Davidson, Peter L. Monkmeyer and Charles K. Sollitt, WW Mar. 88 p220-236.

Offshore drilling

Forces on Marine Risers in Coexisting Environment, Zeki Demirbilek, WW May 88 p346-359.

Offshore engineering

Computer Simulation of Moored Ship Behavior, G. van Oortmerssen, J. A. Pinkster and H. J. J. van den Boom, WW Mar. 86 p296-308.

Offshore pipeline

Effect of Lee-Wake on Scour Below Pipelines in Current, B. Mutlu Sumer, H. René Jensen, Ye Mao and Jørgen Fredsøe, WW Sept. 88 p599-614.

Interaction Between Vibrating Pipe and Erodible Bed, B. Mutlu Sumer, Ye Mao and Jørgen Fredsøe, WW Jan. 88 p81-92.

Seabed Current Boundary Layers in Wave-Plus Current Flow Conditions, Kostas F. Lambrakos, Dag Myrhaug and Olav H. Slaattelid, WW Mar. 88 p161-174.

Wave-Induced Forces on Buried Pipelines, William G. McDougal, Susan H. Davidson, Peter L. Monkmeyer and Charles K. Sollitt, WW Mar. 88 p220-236.

Offshore structures

Discrete Wave Approach to Wave Force Statistics, Richard H. Swift, WW Nov. 88 p700-713.

Electrodeposited Minerals in Marine Structures, Mark B. Gravens, WW July 88 p519-524.

Generalized Estimation of Wave Force Spectra, Makarand C. Deo and S. ..mpathiengar Narasimhan, WW Mar. 88 p175-190.

Hydrodynamics of Ice Mass Near a Large Offshore Structure, Michael Isaacson and Kwok Fai Cheung, WW July 88 p487-502.

Offshore Breakwaters in Laboratory and Field, Kyungduck Suh and Robert A. Dalrymple, WW Mar. 87 p105-121.

Second-Order Diffraction Loads on Truncated Cylinders, A. G. Abul-Azm and A. N. Williams, WW July 88 p436-454.

Oscillatory flow

Forces on Marine Risers in Coexisting Environment, Zeki Demirbilek, WW May 88 p346-359.

Transition in Oscillatory Flow over Rough Beds, John F. A. Sleath, WW Jan. 88 p18-33.

Overtopping

Irregular Wave Runup on Riprap Revetments, John P. Ahrens and Martha S. Heimbaugh, WW July 88 p524-530.

Parabolic bodies

Parabolic Wave Computations in Non-orthogonal Coordinate Systems, James T. Kirby, WW Nov. 88 p673-685.

Peak values

Discrete Wave Approach to Wave Force Statistics, Richard H. Swift, WW Nov. 88 p700-713.

Periodic functions

Interaction of Periodic Waves with Inclined Portable Barrier, Seyed Mehdi Sobhani, Jiin-Jen Lee and L. Carter Wellford, Jr., WW Nov. 88 p745-761.

Permeability

Armor Layer Stability of Rubble-Mound Breakwaters, Per Anders Hedar, WW May 86 p343-350.

Photogrammetry

Breakwater Gap Wave Diffraction: An Experimental and Numerical Study, John D. Pos and Frederic A. Kilner, WW Jan. 87 p1-21.

Pore water pressure

Wave-Induced Pressure under Gravity Structure, Philip L.-F. Liu, WW Jan. 85 p111-120.

Potential theory

Hydrodynamics of Ice Mass Near a Large Offshore Structure, Michael Isaacson and Kwok Fai Cheung, WW July 88 p487-502.

Predictions

Deep Water Swell and Spectral Wave Decay in Opposing Winds, Ian R. Young and Rodney J. Sobey, WW Nov. 88 p732-744.

Predictive control

Expression for Shoreline Advancement of Initially Plane Beach, Kyungduck Suh and Robert A. Dalrymple, WW Nov. 88 p770-777.

Probabilistic methods

Deterministic and Probabilistic Design of Breakwater Armor Layers, Jentsje W. van der Meer, WW Jan. 88 p66-80.

Probability distribution

Discrete Wave Approach to Wave Force Statistics, Richard H. Swift, WW Nov. 88 p700-713.

Statistical Description of Longshore Transport Environment, J. Richard Weggel and Marc Perlin, WW Mar. 88 p125-145.

Progressive waves

Wave Numbers of Linear Progressive Waves, Chung-Shang Wu and E. B. Thornton, WW July 86 p536-540.

Random waves

Forces on Vertical Cylinder Due to Random Waves, Subrata K. Chakrabarti, WW May 88 p267-280.

Recreation

River Recreation Boating Impacts, Reiner Jaakson, WW May 88 p363-367.

Regression analyses

Wave Phase/Amplitude Effects on Force Coefficients, R. T. Hudspeth, J. H. Nath and P. Khare, WW Jan. 88 p34-49.

Revetments

Irregular Wave Runup on Riprap Revetments, John P. Ahrens and Martha S. Heimbaugh, WW July 88 p524-530.

Riprap

Irregular Wave Runup on Riprap Revetments, John P. Ahrens and Martha S. Heimbaugh, WW July 88 p524-530.

Waterline Oscillation and Riprap Movement, Nobuhisa Kobayashi and Jeffrey H. Greenwald, WW May 88 p281-296.

Rivers

River Recreation Boating Impacts, Reiner Jaakson, WW May 88 p363-367.

Rubble-mound breakwaters

Armor Layer Stability of Rubble-Mound Breakwaters, Per Anders Hedar, WW May 86 p343-350.

Deterministic and Probabilistic Design of Breakwater Armor Layers, Jentsje W. van der Meer, WW Jan. 88 p66-80.

Sand

Expression for Shoreline Advancement of Initially Plane Beach, Kyungduck Suh and Robert A. Dalrymple, WW Nov. 88 p770-777.

Scour

Effect of Lee-Wake on Scour Below Pipelines in Current, B. Mutlu Sumer, H. René Jensen, Ye Mao and Jørgen Fredsøe, WW Sept. 88 p599-614.

Interaction Between Vibrating Pipe and Erodible Bed, B. Mutlu Sumer, Ye Mao and Jørgen Fredsøe, WW Jan. 88 p81-92.

Sea state

Duration of Extreme Wave Conditions, Orson P. Smith, WW Jan. 88 p1-17.

Sea water

Electrodeposited Minerals in Marine Structures, Mark B. Gravens, WW July 88 p519-524.

Sediment concentration

Soft Mud Properties: Voigt Model, Jerome P.-Y. Maa and Ashish J. Mehta, WW Nov. 88 p765-770.

Sediment transport

Mathematical Model for Littoral Drift, Rolf Deigaard, Jorgen Fredsoe and Ida Broker Hedegaard, WW May 86 p351-369.

Sand-Bypassing Simulation Using Synthetic Longshore Transport Data, J. Richard Weggel, Scott L. Douglass and John E. Tunnell, WW Mar. 88 p146-160.

Statistical Description of Longshore Transport Environment, J. Richard Weggel and Marc Perlin, WW Mar. 88 p125-145.

Seepage

Wave-Induced Pressure under Gravity Structure, Philip L.-F. Liu, WW Jan. 85 p111-120.

Shallow water

Diffraction of Waves in Caustics, Donghoon Yoo and Brian A. O'Connor, WW Nov. 88 p715-731.

Shallow-Water Waves. II: Data Comparisons, Donald T. Resio, WW Jan. 88 p50-65.

Ship motion

Computer Simulation of Moored Ship Behavior, G. van Oortmerssen, J. A. Pinkster and H. J. J. van den Boom, WW Mar. 86 p296-308.

Shoaling

Model for Refraction of Water Waves, Robert A. Dalrymple, WW July 88 p423-435.

Shoreline changes

Expression for Shoreline Advancement of Initially Plane Beach, Kyungduck Suh and Robert A. Dalrymple, WW Nov. 88 p770-777.

Simulation

Sand-Bypassing Simulation Using Synthetic Longshore Transport Data, J. Richard Weggel, Scott L. Douglass and John E. Tunnell, WW Mar. 88 p146-160.

Small crafts

Pleasure Craft Profile Heights for Marina Design, Russell H. Boudreau, Emy M. Tatami and John M. Nichol, WW Jan. 88 p95-98.

Spatial distribution

Parametric Hurricane Wave Prediction Model, Ian R. Young, WW Sept. 88 p637-652.

Spectral analysis

Deep Water Swell and Spectral Wave Decay in Opposing Winds, Ian R. Young and Rodney J. Sobey, WW Nov. 88 p732-744.

Wave Numbers of Linear Progressive Waves, Chung-Shang Wu and E. B. Thornton, WW July 86 p536-540.

Stability

Armor Layer Stability of Rubble-Mound Breakwaters, Per Anders Hedar, WW May 86 p343-350.

Deterministic and Probabilistic Design of Breakwater Armor Layers, Jentsje W. van der Meer, WW Jan. 88 p66-80.

Stability analysis

Hydraulic Stability Analysis of Armor Units, Nobuhisa Kobayashi and Ashwini K. Otta, WW Mar. 87 p171-186.

Statistical analysis

Prediction of Tidal Surge in Lower Chesapeake Bay, Joy E. Moses and Carvel Blair, WW Mar. 88 p248-256.

Statistical Description of Longshore Transport Environment, J. Richard Weggel and Marc Perlin, WW Mar. 88 p125-145.

Statistics

Duration of Extreme Wave Conditions, Orson P. Smith, WW Jan. 88 p1-17.

Steady flow

Lift Forces on Pipelines in Steady Flow, Jørgen Fredsøe and Erik Asp Hansen, WW Mar. 87 p139-155.

Stilling basins

Outlet Structure Design for Conduits and Tunnels, Clifford, D. Smith, WW July 88 p503-515.

Stream function

Nonuniqueness in Stream Function Wave Theory, Robert A. Dalrymple and Pedro Solana, WW Mar. 86 p333-337.

Structural design

Outlet Structure Design for Conduits and Tunnels, Clifford, D. Smith, WW July 88 p503-515.

Submarine pipelines

Wave Force Coefficients for Submarine Pipelines, N. Jothi Shankar, Hin-Fatt Cheong and K. Subbiah, WW July 88 p472-486.

Submerged discharge

Model of Buoyant-Jet-Surface-Wave Interaction, David A. Chin, WW May 88 p331-345.

Surface waves

Model of Buoyant-Jet-Surface-Wave Interaction, David A. Chin, WW May 88 p331-345.

Surf-zone

Mathematical Model for Littoral Drift, Rolf Deigaard, Jorgen Fredsoe and Ida Broker Hedegaard, WW May 86 p351-369.

Surge

Prediction of Tidal Surge in Lower Chesapeake Bay, Joy E. Moses and Carvel Blair, WW Mar. 88 p248-256.

Swelling

Deep Water Swell and Spectral Wave Decay in Opposing Winds, Ian R. Young and Rodney J. Sobey, WW Nov. 88 p732-744.

Tidal currents

Modeling Tidal Circulation in an Island's Wake, Roger A. Falconer, Eric Wolanski and Lida Mardapitta-Hadjipandeli, WW Mar. 86 p234-254.

Modeling Tidal Transport in Arabian Gulf, Wen-Sen Chu, Bruce L. Barker and Ali M. Akbar, WW July 88 p455-471.

Seabed Current Boundary Layers in Wave-Plus Current Flow Conditions, Kostas F. Lambrakos, Dag Myrhaug and Olav H. Slaattelid, WW Mar. 88 p161-174.

Tides, astronomical

Prediction of Tidal Surge in Lower Chesapeake Bay, Joy E. Moses and Carvel Blair, WW Mar. 88 p248-256.

Tombolo

Offshore Breakwaters in Laboratory and Field, Kyungduck Suh and Robert A. Dalrymple, WW Mar. 87 p105-121.

Transition points

Outlet Structure Design for Conduits and Tunnels, Clifford, D. Smith, WW July 88 p503-515.

Trenches

Wave Interaction with Rectangular Trench in Density-Stratified Fluid, Francis C. K. Ting and Fredric Raichlen, WW Sept. 88 p615-636.

Tunnels

Outlet Structure Design for Conduits and Tunnels, Clifford, D. Smith, WW July 88 p503-515.

Turbulence

Transition in Oscillatory Flow over Rough Beds, John F. A. Sleath, WW Jan. 88 p18-33.

Two-dimensional flow

Interaction of Periodic Waves with Inclined Portable Barrier, Seyed Mehdi Sobhani, Jiin-Jen Lee and L. Carter Wellford, Jr., WW Nov. 88 p745-761.

Underwater pipelines

Lift Forces on Pipelines in Steady Flow, Jørgen Fredsøe and Erik Asp Hansen, WW Mar. 87 p139-155.

Uplift pressure

Wave-Induced Pressure under Gravity Structure, Philip L.-F. Liu, WW Jan. 85 p111-120.

Velocity

Bedform Length and Velocity Pulsations in Alluvial Channels, Khalid Mahmood and Muhammad I. Haque, WW May 88 p315-330.

Vertical cylinders

Discrete Wave Approach to Wave Force Statistics, Richard H. Swift, WW Nov. 88 p700-713.

Forces on Vertical Cylinder Due to Random Waves, Subrata K. Chakrabarti, WW May 88 p267-280.

Vertical forces

Parabolic Wave Computations in Non-orthogonal Coordinate Systems, James T. Kirby, WW Nov. 88 p673-685.

Vibration

Interaction Between Vibrating Pipe and Erodible Bed, B. Mutlu Sumer, Ye Mao and Jørgen Fredsøe, WW Jan. 88 p81-92.

Viscoelasticity

Soft Mud Properties: Voigt Model, Jerome P.-Y. Maa and Ashish J. Mehta, WW Nov. 88 p765-770.

Vortex shedding

Effect of Lee-Wake on Scour Below Pipelines in Current, B. Mutlu Sumer, H. René Jensen, Ye Mao and Jørgen Fredsøe, WW Sept. 88 p599-614.

Interaction Between Vibrating Pipe and Erodible Bed, B. Mutlu Sumer, Ye Mao and Jørgen Fredsøe, WW Jan. 88 p81-92.

Wakes

Effect of Lee-Wake on Scour Below Pipelines in Current, B. Mutlu Sumer, H. René Jensen, Ye Mao and Jørgen Fredsøe, WW Sept. 88 p599-614.

Modeling Tidal Circulation in an Island's Wake, Roger A. Falconer, Eric Wolanski and Lida Mardapitta-Hadjipandeli, WW Mar. 86 p234-254.

Waste management

Managing Contaminated Dredged Material: Application, James W. Male, M. John Cullinane, Jr. and Keith Phillips, WW Sept. 88 p565-581.

Procedure for Managing Contaminated Dredged Material, James W. Male and M. John Cullinane, Jr., WW Sept. 88 p545-564.

Water level fluctuations

Waterline Oscillation and Riprap Movement, Nobuhisa Kobayashi and Jeffrey H. Greenwald, WW May 88 p281-296.

Water levels

Prediction of Tidal Surge in Lower Chesapeake Bay, Joy E. Moses and Carvel Blair, WW Mar. 88 p248-256.

Water waves

Calculation of Evanescent Wave Modes, W. D. McKee, WW May 88 p373-378.

Model for Refraction of Water Waves, Robert A. Dalrymple, WW July 88 p423-435.

Nonuniqueness in Stream Function Wave Theory, Robert A. Dalrymple and Pedro Solana, WW Mar. 86 p333-337.

Wave Numbers of Linear Progressive Waves, Chung-Shang Wu and E. B. Thornton, WW July 86 p536-540.

Wave-Induced Pressure under Gravity Structure, Philip L.-F. Liu, WW Jan. 85 p111-120.

Wave action

Wave Interactions between Barges, P. Sayer and H. K. Liang, WW May 86 p402-417.

Wave attenuation

Energy Losses and Floating Breakwater Response, Mario Fugazza and Luigi Natale, WW Mar. 88 p191-205.

Wave diffraction

Breakwater Gap Wave Diffraction: An Experimental and Numerical Study, John D. Pos and Frederic A. Kilner, WW Jan. 87 p1-21.

Diffraction of Waves in Caustics, Donghoon Yoo and Brian A. O'Connor, WW Nov. 88 p715-731.

Diffraction Patterns Near Narrow Breakwater Gap, Rodney J. Sobey and Thomas L. Johnson, WW July 86 p512-528.

Refraction-Diffraction Model for Linear Water Waves, Bruce A. Ebersole, WW Nov. 85 p939-953.

Second-Order Diffraction Loads on Truncated Cylinders, A. G. Abul-Azm and A. N. Williams, WW July 88 p436-454.

Wave dispersion

Interaction of Periodic Waves with Inclined Portable Barrier, Seyed Mehdi Sobhani, Jiin-Jen Lee and L. Carter Wellford, Jr., WW Nov. 88 p745-761.

Wave forces

Discrete Wave Approach to Wave Force Statistics, Richard H. Swift, WW Nov. 88 p700-713.

Forces on Vertical Cylinder Due to Random Waves, Subrata K. Chakrabarti, WW May 88 p267-280.

Generalized Estimation of Wave Force Spectra, Makarand C. Deo and Sampathiengar Narasimhan, WW Mar. 88 p175-190.

Interaction of Wind Waves with Vertical Wall, Witold Cieślikiewiczsz and Stanislaw R. Massel, WW Sept. 88 p653-672.

Second-Order Diffraction Loads on Truncated Cylinders, A. G. Abul-Azm and A. N. Williams, WW July 88 p436-454.

Soft Mud Properties: Voigt Model, Jerome P.-Y. Maa and Ashish J. Mehta, WW Nov. 88 p765-770.

Wave Force Coefficients for Submarine Pipelines, N. Jothi Shankar, Hin-Fatt Cheong and K. Subbiah, WW July 88 p472-486.

Wave Forces on Concrete Armor Units, William G. McDougal, Jeffrey A. Melby and Joseph W. Tedesco, WW Sept. 88 p582-598.

Wave Phase/Amplitude Effects on Force Coefficients, R. T. Hudspeth, J. H. Nath and P. Khare, WW Jan. 88 p34-49.

Wave-Induced Forces on Buried Pipelines, William G. McDougal, Susan H. Davidson, Peter L. Monkmeyer and Charles K. Sollitt, WW Mar. 88 p220-236.

Wave generation

Parametric Hurricane Wave Prediction Model, Ian R. Young, WW Sept. 88 p637-652.

Wave height

Breakwater Gap Wave Diffraction: An Experimental and Numerical Study, John D. Pos and Frederic A. Kilner, WW Jan. 87 p1-21.

Duration of Extreme Wave Conditions, Orson P. Smith, WW Jan. 88 p1-17.

Expression for Shoreline Advancement of Initially Plane Beach, Kyungduck Suh and Robert A. Dalrymple, WW Nov. 88 p770-777.

Mathematical Model for Littoral Drift, Rolf Deigaard, Jorgen Fredsoe and Ida Broker Hedegaard, WW May 86 p351-369.

Parametric Hurricane Wave Prediction Model, Ian R. Young, WW Sept. 88 p637-652.

Wave propagation

Diffraction of Waves in Caustics, Donghoon Yoo and Brian A. O'Connor, WW Nov. 88 p715-731.

Parabolic Wave Computations in Non-orthogonal Coordinate Systems, James T. Kirby, WW Nov. 88 p673-685.

Wave Interaction with Rectangular Trench in Density-Stratified Fluid, Francis C. K. Ting and Fredric Raichlen, WW Sept. 88 p615-636.

Wave Propagation Between Two Breakwaters, Philip L. -F. Liu and Polly L. Boissevain, WW Mar. 88 p237-247.

Wave reflection

Parabolic Wave Computations in Non-orthogonal Coordinate Systems, James T. Kirby, WW Nov. 88 p673-685.

Wave refraction

Model for Refraction of Water Waves, Robert A. Dalrymple, WW July 88 p423-435.

Refraction-Diffraction Model for Linear Water Waves, Bruce A. Ebersole, WW Nov. 85 p939-953.

Wave Numbers of Linear Progressive Waves, Chung-Shang Wu and E. B. Thornton, WW July 86 p536-540.

Wave runup

Irregular Wave Runup on Riprap Revetments, John P. Ahrens and Martha S. Heimbaugh, WW July 88 p524-530.

Laboratory Investigation of Dune Erosion, M. F. Overton, J. S. Fisher and M. A. Young, WW May 88 p367-373.

Wave spectra

Deep Water Swell and Spectral Wave Decay in Opposing Winds, Ian R. Young and Rodney J. Sobey, WW Nov. 88 p732-744.

Generalized Estimation of Wave Force Spectra, Makarand C. Deo and Sampathiengar Narasimhan, WW Mar. 88 p175-190.

Shallow-Water Waves. II: Data Comparisons, Donald T. Resio, WW Jan. 88 p50-65.

Wave tanks

Waterline Oscillation and Riprap Movement, Nobuhisa Kobayashi and Jeffrey H. Greenwald, WW May 88 p281-296.

Wave velocity

Seabed Current Boundary Layers in Wave-Plus Current Flow Conditions, Kostas F. Lambrakos, Dag Myrhaug and Olav H. Slaattelid, WW Mar. 88 p161-174.

Waves

Hydraulic Stability Analysis of Armor Units, Nobuhisa Kobayashi and Ashwini K. Otta, WW Mar. 87 p171-186.

Weight

Armor Layer Stability of Rubble-Mound Breakwaters, Per Anders Hedar, WW May 86 p343-350.

Wind loads

Pleasure Craft Profile Heights for Marina Design, Russell H. Boudreau, Emy M. Tatami and John M. Nichol, WW Jan. 88 p95-98.

Wind waves

Deep Water Swell and Spectral Wave Decay in Opposing Winds, Ian R. Young and Rodney J. Sobey, WW Nov. 88 p732-744.

Interaction of Wind Waves with Vertical Wall, Witold Cieślikiewicsz and Stanislaw R. Massel, WW Sept. 88 p653-672..

AUTHOR INDEX

Abul-Azm, A. G.
Second-Order Diffraction Loads on Truncated Cylinders, with A. N. Williams, WW July 88, p436-454

Ahrens, John P.
